

Inclusive Education at St Peter's College.

St Peter's College strives to ensure that access to a high-quality education is provided for all. Students should consistently feel that they are included in an environment of high expectations, whereby they are both able and enabled to learn at the appropriate level that ensures growth in their learning continuum.

Inclusive education is embedded in all aspects of *St Peter's College*. This incorporates the areas of curriculum, pastoral care, co-curricular activities, administration, and the environment to enable students with individual needs to reach their full potential.

To support students with individual needs, we offer the following support:

The Learning Enrichment Centre.

The Learning Enrichment Centre (LEC) provides a central area where students are encouraged to develop social interactions and receive assistance to access the curriculum.

The Learning Enrichment Team.

Our College has a dedicated team of staff who collaborate with parents, teachers, and professionals to enhance the learning experience for students with individual needs.

- *Learning Enrichment Coordinators.*
- *Learning Adjustment Leaders – Individual needs.*
- *Learning Adjustment Leaders – Exceptional learners.*
- *Learning Support Officers.*

In the classroom.

Students with individual needs are provided with targeted teaching strategies to ensure access and opportunity to all areas of the curriculum.

Teachers are active in utilising data to identify students who will require adjustments - specific to their individual needs.

The College is committed to making the necessary adjustments to both the curriculum and the environment to ensure all students are provided with an inclusive experience.
